We all know that the business environment at the present time is very challenging and the construction sector is under particular strain. In these circumstances no organisation can afford to waste money or for that matter miss out on opportunities to recover expenditure where tax credits are available. An obvious concern is that construction businesses should be taking maximum advantage of the opportunities for R&D Tax Relief.

Companies involved in the development of off-site solutions and other forms of innovation will be investing money in Research and Development but may not be maximising the benefits available under the UK Tax system. This is your opportunity to find out if you could be recovering more of your investment.

In support of its Members and Guests Buildoffsite is pleased to host a special Business Breakfast Briefing on "Maximising R&D Tax Relief" featuring Gareth Edwards of ela8. This is your opportunity to find out if you could be recovering more of your investment.
