

Buildoffsite Registration Scheme Familiarisation Seminar

2.00pm - 5.00pm on Wednesday 24 June 2009

Your opportunity to understand more about the registration scheme, the benefits of accreditation and gain an insight from organisations having undergone registration as well as those currently progressing the scheme.

Buildoffsite is pleased to host a Seminar session to promote the Buildoffsite Registration Scheme operated by Lloyd's Register.

The venue will be the offices of Lloyds Register, 71 Fenchurch Street, London, EC3M 4BS

Attendance at this seminar is free but places are limited and advance registration is essential.

Seminar Details

The purpose of the Buildoffsite Registration scheme is to ensure safe and competent delivery of a product or service which meets client requirements and serves as the vehicle for the standardisation of best practice across the offsite construction industry.

The scheme is a process based evaluation which benchmarks offsite providers against best practice from a risk management perspective.

The scheme accreditation categories are:

- **Design**
- **Manufacturing**
- **Construction**
- **Project management.**
- **Product** – integrated floor cassettes project

The seminar will provide:

- an introduction to the scheme and its benefits

- a client perspective of the scheme
- the perspective of an offsite provider who is currently accredited
- the perspective of an offsite provider currently progressing the scheme
- the reasons why the scheme is gathering interest internationally
- the basis for an extension of scope and terms of reference

The seminar will provide an ideal opportunity for organisations to understand more about the scheme, the benefits of accreditation and gain an insight from organisations having undergone registration as well as those currently progressing the scheme.

Specifically the seminar will help you understand how Buildoffsite Registration helps ensure best practice delivery in the offsite construction industry for products and services.

In addition, the seminar will review progress on the development of a generic specification for floor cassettes and how the registration scheme will form an integral part of the process, moving forward.

Seminar Programme:
