

Howick - Discovering offsite TOUR

Date: 11 March 2010

Venue: HENROB Ltd, 2nd Avenue, Zone 2, Deeside Industrial Park, Flintshire, CH5 2NX, UK.

Host: Howick and Henrob

Description of tour

Howick are world leaders in light gauge steel rollforming machines and framing development. Ranging from non load bearing panels to fully load bearing panels for multi storied structures and floor joists.

Henrob's SPR Technology is best known for its automotive applications and has unique advantages for offsite construction.

Vertex are leaders in building design software their packages allow the entire building to be designed including all the architectural, structural, and manufacturing.

Stephen Napper Associates have a vast knowledge about the uses and benefits of LGSF technology and will briefly discuss the new Eurocodes (EC3 / EN1993-1-1 & 3) coming into effect in March 2010.
