

Britspace has a Goodsite!!

As part of the Considerate Constructors Scheme, Britspace and special guest Ivor Goodsite attended the morning assembly at the Robert Blair Primary School, which is located next to the British Transport Police project.

Ivor assisted Britspace with a presentation on the importance of site safety and a demonstration, involving some of the children, to show the correct PPE which must be worn.

Following the assembly, 7ft tall Ivor was greeted with hugs and smiles by the nursery and reception class children before supervising the tour of the BTP project where groups of 20 children at a time, kitted out with high visibility vests and hard hats, were taken around a safe secure area and shown inside the new custody suite and holding cells.

Britspace is keen to educate children at an early age that not all buildings are produced using traditional bricks and mortar and emphasise the importance of health and safety awareness to keep them safe. The children were each left with a fun pack as a reminder of the day.

For further information on the solutions Britspace provides for the education, healthcare, residential, military, custodial, and commercial sectors please visit www.britspace.com or call us on T: 01430 444400.

Ends.
