Seminar 3

Achieving Design Quality with offsite

13.00 - 14.00

This panel discussion will discuss the importance of good design, raising the bar for conceptual quality, for place-making and enhanced sustainability and how we need to help clients understand what they must do differently to reap the benefits a DfMA approach can bring.

Seminar 4

Delivering the New Skills the Industry Needs

14.30 - 15.30

The Construction industry is in transition. New products, new technologies, ubiquitous application of digital, new forms of construction design and delivery close coupled with an unprecedented need for the industry to address the key issues of productivity and sustainability. This Seminar will address some of the ways in which the new skills agenda is being addressed.

Workshop 1

Systemic Project Delivery

Delivering projects ahead of time and budget – Yes we can!

10.30 - 11.15

Why is it that so many construction projects go out of control both in terms of time and cost? Is this just an inevitable feature of investing in construction – both in the UK and internationally?
